

# Overmoulding material specifications

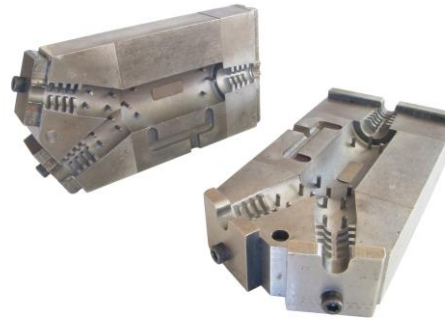

Pambry Cable Assemblies are a combination of high quality robust military standard connectors and cables alongside robust overmoulding procedures and materials.

Pambry has decades of experience of custom design and bespoke solutions.

All of our moulding material used in our cable assemblies are made of “Flexible thermos plastic Elastomer”  
This combined the flexibility of rubber alongside the strength of thermos plastic.

If you are interested to find out more please contact us, and if requested we can forward you a sample to see for yourself hands on the capabilities of this product.
